
Lineman-Specific Program

4-Week Strength & Power

Program Overview

This program is built specifically for offensive and defensive linemen. The emphasis is on raw strength, functional power, and position-specific movement patterns. The 4-day split targets max strength, explosive power, hypertrophy (size), and position-specific work. Heavy compound lifts are the foundation — squat, bench, deadlift, clean, and press. Accessory work focuses on grip strength, core stability, and the ability to move heavy objects. Linemen do not need to run a 4.4 forty — they need to dominate the man across from them for 4-5 seconds every snap.

How to Use This Template

Fill in the "Actual Weight," "Reps Done," and "Notes" columns after each session. Track your progress week-over-week to ensure progressive overload. If you miss a rep target, note the reason and adjust the following session accordingly.

Warm-Up Protocol

- Light bike or walk: 5 minutes
- Foam roll: IT band, quads, upper back, lats — 3 minutes
- Hip circles x 10 each direction
- Band pull-aparts x 15
- Goblet squats x 8
- Push-ups x 10
- Movement-specific warm-up: 2-3 sets at 50-65% of working weight
