Program Overview

This 6-week speed and agility program is broken into three 2-week phases. Weeks 1-2 focus on technique: proper sprint mechanics, body positioning, and movement patterns. Weeks 3-4 increase intensity with faster reps and shorter rest periods. Weeks 5-6 push to competition speed with timed reps and competitive drills. There are 3 sessions per week: Session A (linear speed), Session B (change of direction), and Session C (plyometrics). Always begin with a thorough dynamic warm-up. Never train speed while fatigued — quality over quantity.

How to Use This Template

Fill in the "Actual Weight," "Reps Done," and "Notes" columns after each session. Track your progress week-over-week to ensure progressive overload. If you miss a rep target, note the reason and adjust the following session accordingly.

Warm-Up Protocol

- Light jog: 400 meters
- High knees x 20 yards
- Butt kicks x 20 yards
- A-skips x 20 yards
- B-skips x 20 yards
- Lateral shuffles x 20 yards each direction
- Carioca x 20 yards each direction
- Leg swings: 10 front-to-back, 10 side-to-side each leg
- Build-up sprints: 3 x 40 yards at 60%, 70%, 80%
